Localization and innovation in e-mobility in Africa

wahu!

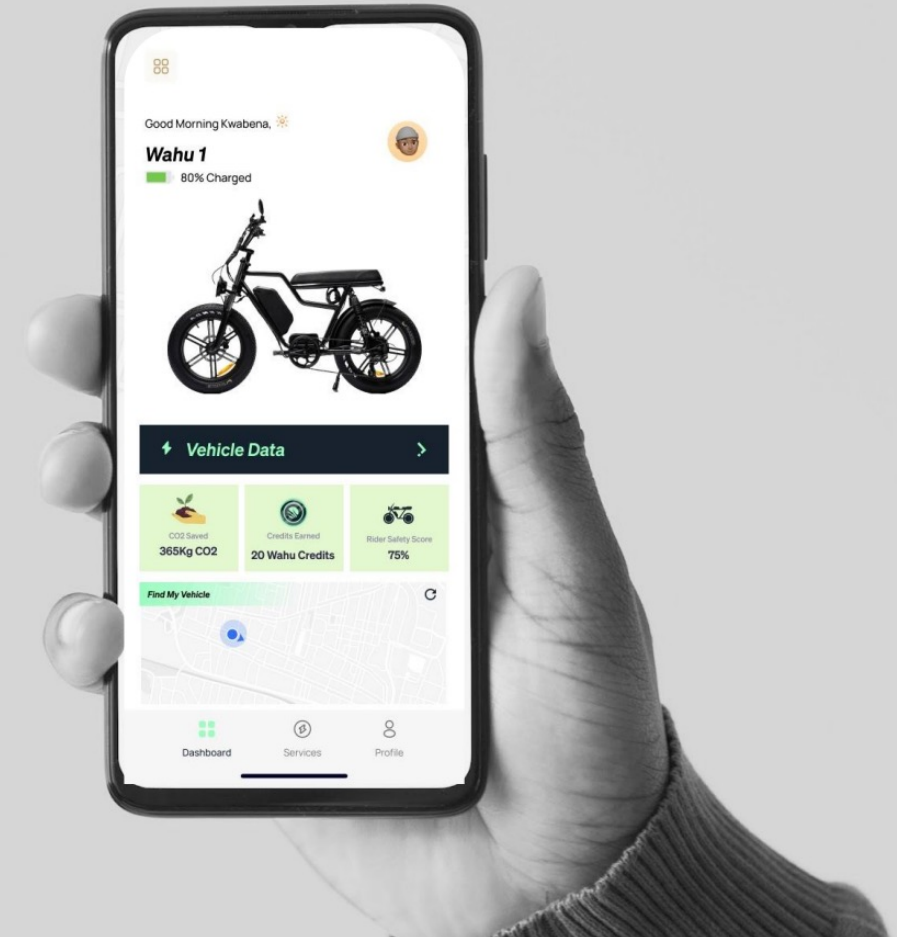

Charged with Freedom

Our Vision

To catalyse Africa's transition to sustainable mobility by building the talent, vehicles, and interconnected ecosystem making it easy, affordable, and accessible to all.

Our Solution

We have designed an electric vehicle for the African Gig Economy. Our signature Wahu eBike. Our Wahu eBike is connected to our Rider Management App. This allows us to offer delivery riders a vehicle that doesn't need fuel and via the app we offer support services to empower riders; subscribe-to-own plans, insurance, maintenance jobs and road safety education.
