

PRESENTATION

BY

WORKING GROUP IV

Recommendations on imported vehicles

- Set standards as basis for ensuring the quality of imported vehicles. These standards must be anchored on supporting harmonized policies, laws and regulations for EAC
- Sensitization and awareness of all stakeholders in the sector on standards amongst
- License motor vehicle importers
- Develop capacity building of implementers of the standards i.e. regulators, Government

Recommendations

- Appoint agents to inspect vehicles in country of origin and issue compliance certificates. Where there no appointed agents, the importer must communicate to the responsible authority.
- Monitoring and evaluation of compliance

Recommendations for in-use vehicle emission inspection

- Develop the standards for inspection of in use service vehicle.
- Develop the standards for garages, spare parts, fuel quality
- Stakeholder engagement about developed standards
- Set up inspection facilities to enforce compliance with those standards
- License garage operators
- License spare parts dealers

Recommendations for in-use vehicle emission inspection

- Frequency of inspection
 - ❖ Twice a year for commercial vehicles
 - ❖ Once a year for non commercial vehicles
- Monitor compliance and issue monitoring reports on compliance
